

SHANNON SLIPWAY DESIGN - SAFETY

INTRODUCTION

We want you to have lots of fun but safety is something the RNLI is very passionate about, so please ensure that you follow the guidelines below and most importantly, stay safe!

MANAGE THE RISKS

Risk Assessment – Please ensure that you do a risk assessment before starting this activity. Risk assessments are a vital tool to help you identify and hazards and put mitigations in place to reduce the chance of any accidents. Visit our website for information on risk assessments by clicking [here](#) or type in RNLI.org/safeandlegalfundraising and find the section titled 'risk assessments' for more information.

SAFETY CONSIDERATIONS

Thankfully, there aren't many hazards associated with this activity. However, please note that some hazards will depend on other things like your location, materials used and whoever is taking part. Therefore, please consider all your hazards carefully when doing the risk assessment specific to your activity.

 No model building is required for this task. If you do try this, be careful of the materials used, of any tools used in construction and of any sliding or moving parts.

 Please use calculators properly and don't take them apart

 Please be sensible with pens and pencils particularly if they're sharp

RNLI cannot accept any liability for the activities as it has no control over them and as such, participation in these activities is entirely at your risk. Please visit our website [here](#) for more information.
