Have fun with friends and family with this exciting RNLI rescue game. Choose your craft, rescue the casualty and deliver them to the ambulance crew. Sound easy? It won’t be – you’ll run into some of the problems our crew members and lifeguards face during a rescue!

**How do I make it?**
Colour the game pieces, then carefully cut them out and fold along any dotted lines. You’ll need a dice to play.

**How do I play?**
The first player to reach the end by moving through squares 1 to 50 wins.

**Get ready ...**
Choose your rescue craft and place them on the launch sites.

**Launch!**
Take it in turns to roll the dice. When you get a 6 you can move your craft into the green launch circle – you then get another roll to get your first number of moves.

**Action**
When players land on an action square they must follow the instructions. If you get a false alarm you must go back to square 1 but you don’t need to roll 6 to start again.

**Life saved!**
The first player to reach square 50 and successfully roll a 6 is the winner!
